

## Easy Installation

The Viroguard simply fits on top of the fan curb (off the roof so you can see the roof below the unit) attaching into the ductwork with the exhaust fan fitting on top of Viroguard sealing off all areas from leaking grease from the fan!

Viroguard comes with a standard 1-1/2" hose barb to fit standard industrial vacuum hoses so all the grease and cleaning waste can be run down to a wet vacuum or to other alternative approved container. The unit can also be hand drained in case your service company lacks a wet vacuum or vacuum hose.

Viroguard can also be plumbed back into the grease stack, allowing your cleaning company to simply open the valve and backup safety plug during the cleaning process and drain the waste back into the grease exhaust system for capture below.

## Specifications:

- Manufactured using 16-gauge, 304 stainless steel – made to last a lifetime
- Seamless welded unit does not allow any grease to reach the roof
- Over 5 cubic feet of capacity for a standard six foot unit
- Exclusive rain shield keeps rain out even with a 10-15" rainfall
- Includes complete custom VIROSPEC stainless steel hinge kits
- PVC custom ball valve resists grease, water and the weather for long life
- Patented (U.S. Patent No. 6,716,099)
- UL-listed #17DP
- Limited lifetime warranty against factory defects

## How to Order

New Construction can specify in their drawing our in stock, pre-made standard Viroguard units that are designed for most major upblast fan makes and models.

**For existing stores:** Viroguard can also be custom fabricated for your duct and fan base. All we need are a few simple measurements. Please refer to our measuring guide at [www.enviromatic.com/measuring](http://www.enviromatic.com/measuring). Once you have the measurements and a digital photo, go to [www.viroguard.com/order](http://www.viroguard.com/order), fill in the form, attach the digital photo and we will contact you to confirm your order. It's that easy!

## What is a Viroguard®

Viroguard is a UL listed stainless steel containment system that fits at the base of your rooftop fan sealing off the top of the curb area and collecting all the grease and cleaning waste so it doesn't run onto your roof. Viroguard keeps rain from overflowing it (and contains the grease in all weather conditions) with the unique hinged rainshields. Your exhaust cleaning company simply flushes and drains the unit during their normal cleaning visit. Viroguard does not use expensive pad, diapers, rock, sand or any other foreign material that can leak and have to be inspected, replaced and disposed of. Viroguard also fits off the roof so you can easily see your clean roof under it. It is simply the **perfect solution** for your rooftop grease problems!

## Viroguard Benefits

- ✓ Reduce ongoing maintenance costs
- ✓ Protect your roof
- ✓ Prolong your fan life
- ✓ Comply with federal and state laws

Welded stainless steel construction (Won't leak, will last a lifetime)

VIROSPEC Hinges: protects your fan

Fixes most curb installation problems

## Cleaning Procedure *(Absolutely no grease on the roof during the cleaning!)*

Opening up rain flaps

Hooking up vacuum hose

Keeping the grease and wastewater off the roof during the cleaning process...  
You're always protected - not a drop of grease touches the roof ever!

## Satisfied Customers Agree

"We are very pleased with the units and not only have been adding them to all new construction for some time but are now in the process of going back and adding them to all of our units. Feel free to give my contact information to anyone you wish and be assured I will speak very highly of the product and your organization."
